

## Clinical proof of longer lashes.

A clinical study confirmed that patients who used MD Lash Factor™ for one month saw over 50% improvement in the appearance of their natural eyelash length.<sup>1</sup>

## Patients see visible results.

"My lashes grew so quickly I actually had to trim them."

"No more false eyelashes."

"My eyes are so much bigger and brighter."

"It's fantastic for contact lens wearers like me."

# Long, longer, longest lashes.

## Introducing MD Lash Factor.™

Transforming the science of skin care.

# PROCYTE™

A PHOTOMEDEX® COMPANY

# Restore your lashes naturally.

## Your lashes. Only better.

Full, voluminous eyelashes have long been one of the trademarks of true beauty. Scientifically formulated by Dr. Susan F. Lin, MD Lash Factor™ is the natural way to give your own lashes a glamorous transformation.

## See a difference in as little as one week.

MD Lash Factor has been clinically shown to improve the appearance of lash length, thickness, and fullness—with eye-opening results in as little as one week for some patients.<sup>1</sup>

## Supports natural growth and regeneration.

Unlike false eyelashes or messy mascaras that create only an illusion of longer lashes, MD Lash Factor™ is scientifically formulated to work with your eyelashes' natural growth and regeneration cycle. Whether your lashes are thinning because of a nutritional imbalance, medical treatments, or harsh detergents, this clinically proven formula can help restore your eyelashes to their full potential.

"I am amazed with the results. My lashes have never been so long."

## A beautiful addition to your nightly routine.

MD Lash Factor™ is safe to use with your regular skin care products. Simply apply nightly like liquid eyeliner to condition and improve the appearance of your natural eyelashes.

"I saw a noticeable change almost immediately. My lashes are long and thick thanks to MD Lash Factor!"

## Physician tested. Patient trusted.

MD Lash Factor is ideal for people with thinning lashes, or for anyone who wants to improve the appearance of their eyelashes naturally. It is also a safe and gentle way to restore fullness to thinning eyebrows.

- Safe for contact lens wearers
- Hypoallergenic
- Gentle formulation for sensitive eyes
- Ophthalmologist and dermatologist tested
- Paraben free
